

Uploading Activity Location Data – Guide for Local Authorities

Activity Locations

An Activity Location is any place where physical activity is carried out. Examples include a GAA ground, a town park, a beach or a leisure centre.

Activity Locations will include:

- Public Places (Parks, beaches, green spaces, playgrounds etc)
- Sports Locations/Facilities (Pitches, swimming pools, leisure centres etc)
- Recreational Facilities (Piers/moorings, outdoor gyms, bike hire etc)
- Any other Relevant Data (Please include or ask if not sure)

Data Template

- You can [download the Activity Location bulk template on this webpage](#).
- Click the “Download” button in the top right of the page.
- It will download a Zip file. A Zip file is a compressed version of a file – in this case the Excel template. [More info on how to open Zip files](#).
- Open the Zip file and it will contain an Excel file named ‘ActivityLocation Bulk Upload V2.2.xlsm’
- When you open the Excel file make sure you click the “Enable macros” option. Macros are little rules inside the Excel file we use to ensure data quality.

Email the completed Excel spreadsheet back to us, and we will check it, then upload it to the website.

Data fields to Enter

It is strongly encouraged to include information for all fields if possible. This will allow the public to find clubs more easily and will help Local Authorities with their analysis and development work. However, some are considered *required*, other *recommended*, while others

are *optional*. If a field is marked as required and the information is not filled in, the submission will not be accepted for upload.

We hope you can have the completed templates back to us by **May 26th**.
